## Wild Light Images Quality Photographic Prints

### Presentation and Framing options

All metal frames will be in an anodized matt black unless requested otherwise. I feel that this framing choice not only compliments my images nicely, but also provides for a generally neutral effect in most home environments. I do however offer two styles of wooden frames for a number of images because of the way they enhance the overall presentation of the print. For this option there are two choices: one is a more formal looking green and black stained wood with a gold inner band. The other is a custom made "Adirondack styled" frame using the bark and branch wood of birch. These are all hand crafted by renowned frame maker Bob McLean of Tamworth, N.H. and impart a rustic hand made quality to the overall presentation. If you are looking for a unique frame to fit the décor of a den or camp type setting then you should consider this frame choice.
